

## Elective Services

For all of the expectant parents as well as grandparents and friends, you can see your unborn baby in live 4D motion. **Clinica Santa Maria** uses brand new cutting edge 4D ultrasound technology to bring images of your unborn baby to life. From a yawn to a stretch, or the beating of your baby's heart, your ultrasound will allow you to take a peek at your baby's first movements inside the womb. Imagine being able to see your baby sucking on her thumb. Imagine seeing him wave his little hand at you. Imagine actually being able to see your baby's face! With our exciting new 3D & 4D ultrasound technology, you can actually see what your baby is going to look like before he or she is born!

## Ask about your free 3D baby picture!

With our new 3D and 4D ultrasound imaging, we can let you see what your child looks like while they are still growing in the womb. Expectant parents who wish to view their unborn child will experience a three-dimensional ultrasound with real-time movement. By performing the ultrasound in 4D color technology, the bonding experience that you will share will be an incredible one that you will carry with you for a lifetime! Please review the packages below and select one that will be right for you. Please call us at **956-544-2001** to make an appointment or to ask any questions you may have.

- Sex Determination\* (Upon request).
- Discounts on future visits and packages.

---

#### \*\*Please note:

Women seeking an elective prenatal ultrasound with Envision Ultrasound Center must already be receiving treatment with a healthcare provider for prenatal care and have already undergone a medical, diagnostic ultrasound ordered by their provider to confirm their due date, screen for fetal anomalies, and to look for any other pregnancy related issues. During the elective prenatal ultrasound session, we will be conducting a limited diagnostic scan to confirm heartbeat, the number of babies in the pregnancy, the position of the baby, and the placental location. Please note, at no time is this exam to be used in place of a complete diagnostic ultrasound.

### **Basic 3D / 4D Package: \$150**

Our Basic 3D package provides couples with the opportunity to view and capture 3D & 4D images of their unborn baby. Our basic package includes a 15+ minute ultrasound session plus all of our standard features and a 25% discount off any return visit.

---

### **Gold 3D / 4D Package: \$175**

  - 40% off any return elective service.
- 

### **Platinum Plus 4D Package: \$275**

Our Platinum Plus package provides you with the very best opportunity to capture 3D and live 4D images of your child throughout your pregnancy. With our platinum plus package you will receive two 3D/4D ultrasounds. The first will take place between the 25th and 28th week of pregnancy, this is the optimal time for visualizing fetal movement and capturing images of large portions of your baby. The second appointment will take place between 32 and 34 weeks. During this ultrasound we can capture extraordinary 3D and 4D images of your baby's facial features and give you the opportunity to see how much your baby has grown. The platinum plus package includes 2 – 30- minute ultrasound sessions as well as all of our standard features plus the additional features listed below:

- Two 5x7 colorized portrait prints set in a custom folder during each visit.
- One CD for each visit with 15-30 high-resolution 3D still images suitable for printing and emailing to family and friends. 2 -3 4D video segments as video files for viewing on your computer or over the Internet.
- 50% off any return elective service.
